

HARSHIT SHARMA

Aspiring Technical Consulting Engineer | Cisco NetAcad CCNA Coursework | AWS Cloud & API Troubleshooting
Greater Noida, India | +91 73025 79392 | harshitbhardwajhs@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate who completed the Cisco Networking Academy CCNA coursework sequence (Introduction to Networks; Switching, Routing & Wireless Essentials; Enterprise Networking, Security & Automation) plus Introduction to Cybersecurity. Hands-on with AWS cloud/API deployment and basic troubleshooting using Lambda, API Gateway, ECS Fargate, Docker, CloudWatch logs, and structured network/API checks. Comfortable with TCP/IP, DNS, DHCP, subnetting, NAT, routing/switching concepts, and clear technical documentation.

TECHNICAL SKILLS

- **Networking (Cisco NetAcad coursework):** TCP/IP, OSI model, IPv4 subnetting, DNS, DHCP, ARP, NAT, VLAN concepts, routing/switching fundamentals, HTTP/HTTPS, SSL/TLS basics
- **Troubleshooting Tools:** ping, traceroute/tracert, nslookup, dig, curl, ipconfig/ifconfig, netstat, AWS CloudWatch Logs
- **Cloud & Systems (applied):** AWS Lambda, API Gateway, ECR, Amplify, ECS Fargate, ALB, CloudWatch, IAM basics, Security Groups, Docker, Terraform basics, Linux/OS basics
- **Programming & APIs:** Python, Flask, FastAPI, REST APIs, JavaScript basics, SQL basics, Git/GitHub

PROJECTS

TrustNet CyberCop - AWS-Deployed URL Risk Analysis Platform [GitHub](#) | [Live Dashboard](#)

Stack: Python, Flask, React, Scikit-learn, AWS Lambda, API Gateway, ECR, Amplify, CloudWatch, Docker

- Deployed a Flask inference API on AWS Lambda via ECR, exposing /health and /predict endpoints through API Gateway, with a React dashboard hosted on Amplify.
- Troubleshot CORS errors, route integration issues, and API response failures using API Gateway checks and CloudWatch logs; built a 47-feature URL risk model with input validation and verdict reasoning.

AWS ECS Fargate CloudOps Lab - Terraform Basics & API Troubleshooting [GitHub](#)

Stack: FastAPI, Docker, AWS ECS Fargate, Terraform basics, ECR, ALB, IAM, Security Groups, CloudWatch

- Built a Dockerized FastAPI service with /health, /version, /metadata, and /error endpoints for deployment checks, health checks, and failure simulation.
- Used Terraform basics to understand core resources such as ECR, ECS task/service, ALB health checks, IAM roles, security groups, and CloudWatch logs; documented Docker, port/listener, health-check, and log-based troubleshooting.

Nexus Command Center - Full-Stack Team Task Manager [GitHub](#) | [Live](#)

Stack: React, Node.js, Express, MongoDB, JWT, Vercel; earlier tested on Railway

- Built a collaboration app with secure login, role-based access, project/task workflows, search, pagination, and dashboard analytics; debugged JWT auth failures, incorrect routes, DB connection issues, and environment-variable errors.

EDUCATION

B.Tech, Computer Science Engineering - G.L. Bajaj Institute of Technology and Management, Greater Noida | 2022-2026 | CGPA: 7.2

CERTIFICATIONS

- Cisco Networking Academy: CCNA Introduction to Networks - 2025
- Cisco Networking Academy: CCNA Switching, Routing, and Wireless Essentials - 2025
- Cisco Networking Academy: CCNA Enterprise Networking, Security, and Automation - 2025
- Cisco Networking Academy: Introduction to Cybersecurity - 2025
- AWS Academy: Cloud Foundations, Cloud Architecting
- Python Essentials - Cisco | SQL - IBM

ACHIEVEMENTS

Top 4 - HackSpark Hackathon (TrustNet CyberCop) | Top 20 Finalist - HelloPM AI Sprint | College-Level Finalist - Smart India Hackathon
